PROGRAM

28.11.2012 Wednesday

13:00 - 18:00	COURSE Electrical Treatment: Pacemaker/ICD and So on!
13:00 - 14:00	PART I: PACEMAKER FOLLOW-UP Pacemaker Follow-Up: ECG/Holter, X-Ray, ECHO VVI Pacemaker Programming VDD/DDD Pacemaker Programming Troubleshooting pacing systems
14:00 - 15:00	PART II: ICD FOLLOW-UP Evaluation of appropriate/inappropriate shocks Status of ICD lead recalls Troubleshooting ICDs Lead extraction
15:00 - 15:30	Coffee Break
15:30 - 16:30	PART III: RESYNCHRONISATION THERAPY Implant and programming Hints at Follow-Up ECG in CRT Troubleshooting
16:30 - 18:00	PART IV: CASE DISCUSSIONS
19:00 - 20:30	OPENING CEREMONY

29.11.2012 Thursday

09:00 - 10:30	ABLATION I Nonfluoroscopic Approach for SVT Ablation AVNRT Accessory pathways Ectopic focus tachycardia Ectopic ventricular tachycardia
10:30 - 11:15	Coffee Break
11:15 - 12:30	ABLATION II Status of catheter cryoablation AVNRT Accessory pathways Ventricular arrhythmias Atrial Fibrillation CRYO vs RF in transcatheter ablation of AVNRT in pediatric age: which is better and why? CRYO is better RF is better
12:30 - 14:00	How-to Lunch Sessions (Concurrent) How-To I: How do I perform ablation of ectopic atrial tachycardia? How-To II: How do I manage fetal ectopy, AV block and bradycardia
	Lunch Break
14:00 - 15:30	PACEMAKERS & DEFIBRILLATORS I: New methods Lumenless leads Nontransvenous ICD Home monitoring MRI safe devices
15:30 - 16:15	Coffee Break
16:15 - 17:30	REPOLARISATION SYNDROMES I ECG: Findings/new clues Holter/event/ILR monitoring and exercise testing Risk stratification New therapeutic approaches

30.11.2012 Friday

09:00 - 10:30	ABLATION III Nontransvenous approach Indications: Whom and When? Epicardial approach Arrhythmia Surgery
10:30 - 11:15	Coffee Break
11:15 - 12:30	ABLATION IV: IART Management Mapping

	Ablation methods Other therapeutic approaches
12:30 - 14:00	How-to Lunch Sessions (Concurrent) How to III.How to do I treat fetal SVT? How do I use a nonfluoroscopic approach to ablation in children?
14:00 - 15:15	Sudden Death Approach to patients with resuscitated sudden death and an otherwise normal heart Risk assessment in long QT syndrome Risk assessment in hypertrophic cardiomyopathy
15:15 - 16:00	Coffee Break
16:00 - 17:30	Up to date Short QT syndrome and Early repolarisation Drugs and ECG Asymptomatic WPW syndrome Magnetocardiography and fetal genomics
01.12.2012 Saturday	
09:00 - 10:15	PACEMAKER&DEFIBRILLATORS IV-Cardiac Resynchronisation What do the multi-center adult trials teach us? Current pediatric and congenital heart disease outcomes Current formal and informal Indications
10:15 - 11:00	Coffee Break
11:00 - 12:30	Arrhythmias in postoperative patients:Atrial switch,Fontan and Tetralogy of Fallot Management of atrial arrhythmias Management of ventricular arrhythmias Risk stratification Role of EPS and Ablation In postoperative Fallot
12:30 - 14:00	Lunch and Farewell
