

welcome address

Dear colleagues,

Another arthroscopy course? Not at all! We offer you a unique and special experience:

- 14 interesting live surgeries by top experts, broadcasted via satellite in HD quality
- Many explanations on the procedure itself as well as tips and tricks of the surgeons in advance and throughout the live surgery
- Possibility to ask questions during surgeries and receive answers directly from the surgeon
- Panel discussions with all surgeons: Ask and you will receive honest replies
- Hands-on workshops and symposia during the lunch break will provide further information on the products. Try out specific techniques and implants.

Following the developments in arthroscopy, the separation of arthroscopy and joint surgery is no longer relevant for our course.

Therefore we chose current surgical techniques in shoulder, hip and knee surgery.

The procedures focus on optimizing the function of the joint and reduce invasiveness.

We do without predetermined lectures and removed-from-reality discussions. We rather offer you a focused and genuine experience.

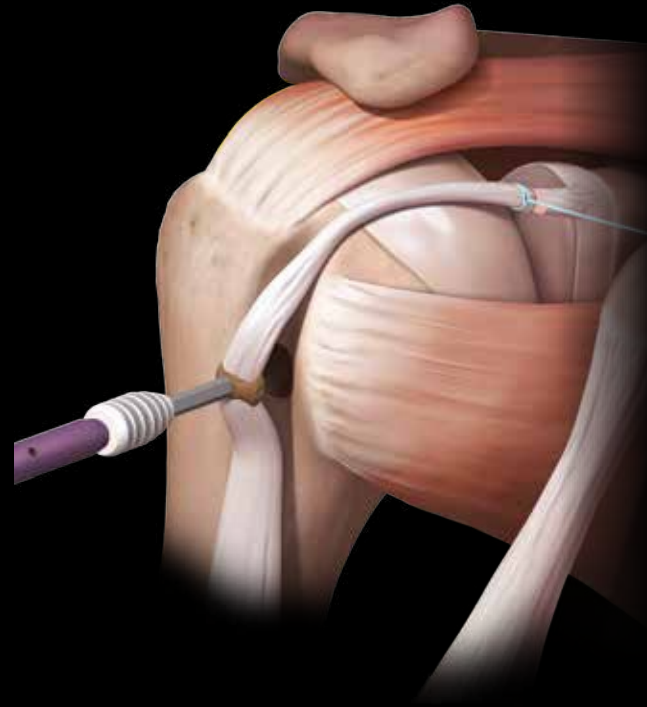

We are looking forward to welcoming you in Hanover!

Prof. H. Lill, PD Dr. J.D. Agneskirchner, Prof. Ph. Lobenhoffer

SwiveLock® Tenodesis

for Arthroscopic Proximal Biceps Tenodesis

- Designed for true arthroscopic biceps tenodesis
- Eliminates the need to externalize and whipstitch the tendon
- Available in BioComposite™ and PEEK in 7, 8, and 9 mm x 15 mm sizes
