8th GCC Conference of Infection Prevention and Control

7th-8th DEC 2015 - Bahrain

Purpose of conference:

“Safe patient environment, an entrance for safe patient care”

Design & Construction

In this conference we aim to emphasize building up a safe environment within healthcare settings and to alert and train engineers and hospital authorities along with all healthcare workers on infection control role in new design and renovation of hospitals including mechanical ventilation and air quality.

Cleaning & Disinfection Maintains the safe environment within patient care area that reflects on reducing hospital acquired infection.

As we have discussed earlier the 8th GCC Conference of infection Prevention and Control will be held in Bahrain on December 7th and for 2 days. We hereby submit our main topics of the conference and we appreciate if you could share with us some of these topics as per your interest.

Main Topics

- Design and renovation of Operating Theaters, Isolation Rooms and Intensive care units .
- Risk assessment of engineering maintenance work within hospitals.
- Proper monitoring of air quality.
- Importance of Cleaning & Disinfection.
- New Diagnostics – ID Debate
- Role of Information Technology in facilitating Infection control Work
- Role of New Technologies in reducing risk of infection
- Infection Control Surveillances
 - SSI Workshop
 - VAP Workshop
 - IV Team & Safe Injection Practices

We would be happy if you could sponsor the session of healthcare associated infections and that would include the following:

1. Sponsoring Speakers
2. The venue rental (inclusive lunch and coffee break equal) to 3000 B.D
3. Sponsoring 5 attendants from outside Bahrain

Definitely this will make you a platinum Sponsor for the event

Dr. Huda ALAnsari

Infection Control Chairperson
