Mission

The VIP congress belongs to an ambitious scientific project started in 2012, aiming to meet every two years scientists from a different geographical area in an international meeting at the highest scientific level.

In the first edition the main guests were Latin Americans, followed in 2014 by North American surgeons.

This edition will see **Asian vascular surgeons** at the center of the scientific scene in what promises to be one of the most important Vascular and Endovascular meetings of 2016. **Don't miss it!**

Conference highlights

- Chimney/fenestration which solution for pararenal AAA?
- Preservation of hypogastric arteries. Why, When and How
- Long term complications after EVAR
- Type II Endoleak: an open issue?
