The European Basic Arthroscopy Course

Arthroscopy is an area within orthopedics that just keeps growing and is getting more and more sophisticated.

It requires lots of time and training to learn and improve on the arthroscopic skills. It is therefore important to teach and learn orthopedic trainees this arthroscopic technique in an early stage during their orthopedic residency training. This is easier said than done. In most cases the trainees learn the principles of this technique while present in the OR. It takes a long time to master this technique.

Why training in arthroscopy?

As there is a high demand for productivity of the Orthopedic surgeons it can be hard to find the time to educate the new generation of Orthopedic Surgeons. Furthermore patient safety must be considered. Thus it is critical to consider alternative methods of raising the standard of education on arthroscopic skills. The most important skills necessary to perform arthroscopic surgery such as hand-eye coordination, triangulation and the ability to work in 3 dimensions while watching a 2-dimensional screen are skills that can be trained using a simulation exercise with animal cadavers and digital simulation. This can lead to improved accuracy, reduced number of errors, reduced number of unnecessary movements and reduced operation time.

Please see www.europeanarthroscopycourse.eu for further information

The European Basic Arthroscopy Course

Organizing Committee

Prof. Dr. Roland Becker

Prof. Dr. Anastasios D. Georgoulis MD, PhD

Prof. Dr. Mustafa Karahan

Dr. Nanne Kort, MD, PhD

Prof. Dr. Pietro Randelli, MD, PhD

Dr. Sven Scheffler, MD, PhD

Orthopedic Surgeon Germany

Orthopedic Surgeon Greece

Orthopedic Surgeon Turkey

Orthopedic Surgeon The Netherlands

Orthopedic Surgeon Italy

Orthopedic Surgeon Germany

Location

Marmara University Sports Sciences and Sports Health Research and Application Center

Hotel

Limak Eurasia Hotel (<http://www.limakeurasia.com>)

Registration fee

350 Euro, includes : course / 3 nights Hotel / transfer hotel to venue / welcome reception / course dinner

Please see www.europeanarthroscopycourse.eu for further information

The European Basic Arthroscopy Course

Program at a glance

Friday 8 November 2013

AM: Introduction and lectures

PM: Workshops:

Saturday 9 November 2013

AM: Lectures

PM: Workshops

Workshops : Cow knee - soft tissue handling - motor skills - sawbone models - joint injections - virtual reality

Friday Evening

Welcome reception and diner

Saturday Evening

Course Dinner

After completing the Basic Arthroscopy course the participants will receive the
Basic Arthroscopy Certificate
