International Foot and Ankle Course

January 20th, 21th, 22th, 2016

Host

Prof. Beat Hintermann and international faculty

Venue

AMTS, MuttENZ, Switzerland

First Announcement

OrthoDays 2016

January 20th, 21th and 22th, 2016

Chairman

Prof. Beat Hintermann

Co-Chairman

PD Dr. Markus Knupp

Content

- Lectures on current concepts in treatment of selected pathologies of foot and ankle
- Practical education in anatomy and surgical operations on cadaveric feet (Wetlab)
- Case discussions with experts in small groups (how to do it, best cases-worse cases)

Main topics

- Arthrodeses for treatment of arthritis of the hind- and midfoot
- Osteotomies for correction of deformities of the foot and ankle
- Soft tissue reconstruction for balancing the foot and ankle

No other field in orthopaedic surgery has grown in the last years as much as foot and ankle surgery. Not only because almost half of the patients seek today an orthopaedic surgeon for a foot and ankle problem, but also because of the increased knowledge to address specific disorders and injuries or their sequela. It is our privilege to dedicate this 19th practical foot skill course to current concepts in diagnostics, decision making and surgical techniques in treatment of these pathologies. The main focus will be on anatomic preparations and surgeries in the Wetlab and discussions in small groups with experts. The international faculty welcomes you to share this unique opportunity with us.
