## « Invitation

OMICS Group welcomes you to attend the **World Congress on Breast Cancer** during **August 03-05, 2015** at **Birmingham, UK**.

We cordially invite all the participants who are interested in sharing their knowledge and research in the arena of Breast Cancer.

Breast Cancer- 2015 anticipates more than 400 participants around the globe with thought provoking Keynote lectures, Oral and Poster presentations. The attending delegates include Editorial Board Members of related OMICS Group Journals.

This is an excellent opportunity for the delegates from Universities and Institutes to interact with the world class Scientists.

The intending participants can confirm their participation by registering for the conference along with your colleagues. Avail the delegate early bird offer.

The main theme of the conference is “**New Discoveries for better Diagnosis and Treatment for Breast Cancer and to bring Awareness**”.

Regards,  
Breast Cancer- 2015 Organizing Committee

## About Us

### OMICS Group Journals

- 400 Open Access Journals
- 21 Day rapid review process
- 30000 Editorial team, 25000 Reviewers team
- 3 Million readers and high visibility
- More than 100000  fans
- Publication immediately after acceptance
- Quality and quick editorial, review processing

#### Key features

- User friendly/feasible website translation of your paper to 50 world's leading languages
- Enhanced feature: Audio version of published paper
- Digital articles to share and explore
- Sharing option: Social networking enabled
- Authors, reviewers and editors are provided with scientific credits

### OMICS Group Conferences

- 300 Conferences all over the World every year
- Well organized scientific program
- Renowned speakers and scientists across the globe
- Poster presentations and world class exhibits
- Panel discussions and interactive sessions
- B2B meetings
- Perfect platform for Global Networking

#### Key features

- Presentation by renowned speakers from all over the world
- Poster presentations and world class exhibits
- Interactive Sessions
- Platform for global networking
- Connecting scientific community

### Special Issues

All accepted abstracts will be published in respective OMICS Group Journals

Each abstract will be provided with digital Object Identifier by 

*Breast cancer is the most common cause of death in women. Research on breast cancer is rapidly progressing, yet the systematic application of current knowledge to improve patient care remains a formidable challenge. The significance can be gauged by the fact that it has made huge advancements over the course of time and is continuing to influence various sectors in diagnosis and treatment of breast cancer.*

### **Breast Cancer- 2015**

- Opportunity to attend the presentations delivered by eminent scientists from all over the world
- Selected contributions will be published in following OMICS Group Journals
  - Journal of Cancer Science & Therapy
  - Chemotherapy: Open Access
  - Journal of Carcinogenesis and Mutagenesis
- Participation in sessions on specific topics on which the conference is expected to achieve progress
- Discuss and discover the latest research on Breast cancer
- Conference brings together Scientific Researchers, Medical, Surgical and Radiation Oncologists, Pharmacists, fellows, Nurses, physician assistants, health care professionals Principal Investigators and Business Entrepreneurs.

## About Birmingham

*Birmingham is a city and metropolitan borough in the West Midlands of England, United Kingdom. Birmingham City Council is the largest local authority in Europe with 120 councilors representing 40 wards. The city lies within the West Midlands Built-up Area, the third most populous built-up area in the United Kingdom and its metropolitan area is the United Kingdom's second most populous. A medium-sized market town during the medieval period, Birmingham grew to international prominence in the 18th century at the heart of the Midlands Enlightenment and subsequent Industrial Revolution, which saw the town at the forefront of worldwide advances in science, technology and economic development, producing a series of innovations that laid many of the foundations of modern industrial society. Birmingham's explosive industrial expansion started earlier than that of the textile-manufacturing towns of the North of England.*

*Today Birmingham's economy is dominated by the service sector. The city is a major international commercial centre, ranked as a beta- world city by the Globalization and World Cities Research Network; and an important transport, retail, events and conference hub. Its metropolitan economy is the second largest in the United Kingdom with a GDP of \$114.3bn and its six universities make it the largest centre of higher education in the country outside London. Birmingham's major cultural institutions – including the City of Birmingham Symphony Orchestra, the Birmingham Royal Ballet, the Birmingham Repertory Theatre, the Library of Birmingham and the Barber Institute of Fine Arts – enjoy international reputations, and the city has vibrant and influential grassroots art, music, literary and culinary scenes.*

*In the UK, breast cancer is the second most common cause of death from cancer in women after lung cancer. The lifetime risk of being diagnosed with breast cancer is 1 in 8 for women in the UK. In the UK in 2011 around 49,900 women were diagnosed with breast cancer, that's more than 130 women every day. Around 350 men in the UK were diagnosed with breast cancer in 2011. Female breast cancer incidence rates in Great Britain have increased by 72% since the mid-1970s. In the last ten years, female breast cancer incidence rates in the UK have increased by 7%. Three-quarters of breast cancer deaths in the UK are in women aged 60 and over. In 2011 in the UK around 11,700 women died from breast cancer, that's around 32 every day. Around 80 men died from breast cancer in the UK in 2011. In 2011 in the UK around 1,200 deaths from breast cancer occurred in women aged under 50. Since peaking in the mid-1980s, female breast cancer death rates have fallen by 40% in the UK. In the last ten years female death rates for breast cancer in the UK have fallen by a fifth.*

*British Cancer Campaign is a unique community of scientists, supporters and people affected by breast cancer and fund world class breast cancer research projects in the UK and Ireland that provide the greatest potential to benefit patients.*
