

Choosing the best time and best embryo for transfer - where are we today?

Nij Geertgen 'Spring' Symposium
Wednesday 1st of June 2016

nij geertgen
centrum voor vruchtbaarheid

Elsendorp, Netherlands

Topic

Daily practice in reproductive medicine clearly demonstrates that there is no consensus on the best day and type of embryo to be chosen for transfer, nor the type of endometrium preparation or type of embryo transfer technique to be used for obtaining the best chance for a healthy pregnancy.

Learning Objectives

Learning objectives are to have an update of theoretical and practical knowledge

- ♥ on the best hormonal stimulation schemes for ART
- ♥ on the importance of oocyte quality
- ♥ on different types of embryo culture, embryo cryopreservation and especially selection of the best day and best embryo for transfer
- ♥ on endometrial receptivity and best embryo transfer technique to be used
- ♥ on implantation of the human embryo.

Target Audience

The target audience consist of fertility specialist, gynecologists, clinical embryologists, IVF laboratory technicians, scientists, nurses and counselors working in the field of reproductive medicine.

Symposium Venue
