the 7th INTERNATIONAL LIVE ENDOSCOPY COURSE

THE NEXT GENERATION, AN ENDO GLOBAL EVENT

FOREWORD

Dear Friends and Colleagues,

for the 7th year we are again committed to bring in Milano the latest developments of Endoscopy and Gastroenterology.

As per our tradition we have gathered a stellar international faculty with scientists coming from all over the world to renovate the link of our meeting with passion, innovation and patient care. Next Generation of physicians will demonstrate and illustrate with live-cases and lectures what is more advanced, cutting-edge and innovative in both diagnostic and therapeutic endoscopy.

For the first time in Europe several new devices and technologies will be introduced to us with plenty of details on indications and future applications.

To keep going with an innovative and always transforming model of education this year we are going to be connected with 3 among the best, most technologically equipped and largest volume endoscopy division worldwide. We will have the chance to get inside their rooms, see how they practice and discover the endoscopy beyond our own boundaries.

Sessions will be organized to keep your eyes and your attention very high on the most hot topics in Gastroenterology and Endoscopy trying to pay very attention to management of pre-neoplastic and neoplastic diseases of the GI and bilio-pancreatic tract.

Altogether with the co-directors, the endoscopy staff and the entire hospital organization we want to offer a very warm welcome to our city, our meeting and our philosophy of patient care.
