

## **ESMINT CONGRESS / 4-6 SEPT, 2014 / NICE**

### **PRELIMINARY PROGRAM**

#### **Thursday, Sept. 4: Joint Meeting with EANS (Vascular Section)**

8h30: Which unruptured brain AVms should be treated? Does ARUBA help making a decision?

Chairman: Peter Vajkoczy, C. Cognard

- ARUBA results: Christian Stapf (10)
- ARUBA, the point-of-view of the neurosurgeon: Mika Niemälä (10)
- ARUBA, the point-of-view of the radiosurgeon: Kemeni (10)
- ARUBA, the point of view of the INR: Laurent Spelle (10)
- Round-table discussion around 5 selected cases (Laurent Pierot, Christophe Cognard) (50)

*10h00: Coffee break*

10h30: MCA aneurysms: surgery or embolisation? Expert opinion and literature evidence

Chairman: Luca Regli, Patrick Brouwer

- In which cases surgery is better? Andreas Gruber
- In which cases is endovascular treatment better? Christophe Cognard
- Place of the new endovascular techniques (Stenting, Flow diversion, Flow disruption? Isil Saatci

11h30: MCA aneurysms: cases presentations

Chairman: Karl Schaller, Jo Battacharya

12h30: Sponsored symposium

*13h00: Lunch buffet*

14h00: Vasospasm and delayed neurological deficit after SAH : management

Chairman: Andreas Raabe, Anil Gholkar

- Recent insights in the pathophysiology: Gabriel Rinkel
- Diagnostic modalities: Jens Fiehler
- How to prevent? Peter Vajkoczy
- Indications for endovascular treatment? Mohamed Aggour

15h00: Vasospasm and delayed neurological deficit after SAH: cases presentations

Chairman: Marco Cenzato, Christian Taschner

16h00: Sponsored Symposium

*16h30: Coffee break*

17h00: Controversy: Spinal dural fistulas: Surgery or Endovascular?

Chairman: Vladimir Benes, Isabel Wanke

- Endovascular: should it be the first line treatment? How to confirm the cure?  
Hans Henkes
- Surgery: first line treatment or second option? Bernhard Meyer

17h30: Spinal dural fistulas: cases presentations

Chairman: François Proust, James Byrne

18h00: Ruptured aneurysms with hydrocephalus: shunting before or after EVT?

Chairman: Mika Niemälä, Lucas Valvassori

Risk of aneurysm rupture due to shunting in untreated ruptured aneurysm?

Risk of shunting after endovascular treatment (under anticoagulation +/- APT)?

- The neurosurgical point of view: Alexandros Andreou
- The neuroanesthesiologist point of view: Citerio

18h30: Management of intraventricular hemorrhage : what can we learn from CLEAR trials? Matthiesen

Chairman: EANS (1), Monika Killer

## **Friday, Sept. 5**

8h30: How to improve the management of acute stroke patients?

Chairmans: Patrik Michel, Jan Gralla

- How to reduce delays for management? Daniel Strbian
- How can imaging improve the selection of patients for IV thrombolysis and mechanical thrombectomy?
  - How to identify salvageable brain? Patrik Michel
  - Salvageable brain: are automated software accurate? Jean-Marc Olivot
  - Are ASPECT score and clot location and length important?
- Current IV thrombolysis trials. Antonio Davalos
- GA/CS. Jens Fiehler

Round table discussion

*10h00: Coffee break*

10h30: Stroke and acute intervention: case presentations

Chairmans : Heinrich Mattle, Salvatore Mangiafico

11h30: Stroke EVT trials: brief summary and results

Chairmans: Keith Muir, Tommy Anderson

Mr Clean: C. Majoie

Thrace: S. Bracard

Piste: P. White

Revascat: A. Davalos

12h00: Sponsored Symposium

12h30: Sponsored Symposium

*13h00: Lunch buffet*

14h00: Sponsored Symposium

14h30: Flow disruption: Results of studies and future

Chairmans: Saruhan Cekirge, Anil Gohlkar

- Luna trial: M. Pötting
- WEB trials: L. Pierot
- Future of Flow Disruption? I. Szikora

15h15: Flow disruption: cases presentations

Chairmans: Markus Holtmannspoetter, Thomas Liebig

*16h00: Coffee break*

16h30: Flow diverters: where are we?

Chairmans: Mats Cronqvist, Edoardo Boccardi

- UK registry: Phil White
- Diversion: F. Turjman
- Results of ESMINT survey: C. Cognard
- Are flow diverters different?
  - Technical point of view: Jean Raymond
  - Clinical point of view: Laurent Spelle

17h30: Flow diverters: cases presentations

Chairmans: Zsolt Kulcsar, Maciek Szajner

With selected cases dealing with the following topics:

- What is the risk of angiographic long-term aneurysm recanalization?
- What is the risk of aneurysm growth despite angiographic aneurysm cure?
- What is the risk of long-term intra-FD thrombosis?

## **Saturday, Sept. 6**

9h00: Delayed intraparenchymal hematomas after FD

Chairmans: Ajay Wakhloo, Civan Islak

- Is it related to dual APT? Comparison with intracranial stenting and cardiology literature. E. Ciceri
- Other potential mechanisms? Zsolt Kulcsar

9h30: Delayed intraparenchymal hematomas after FD: cases presentations

Chairmans: Maria Luisa Biscoito, Stefanita Dima

*10h00: Coffee break*

10h30 Brain AVMs: concepts and techniques to improve embolization results?

Chairmans: Alfredo Casasco, Saruhan Cekirge

- Pressure cooker and other techniques: René Chapot
- Venous approach: precise description of indications and techniques? Jacques Moret

11h: Brain AVMs: cases presentations

Chairmans: Michael Soderman, Naci Kocer

12h20: EJMINT Award

Chairman: Laurent Pierot

*12h30: Lunch buffet*

13h30: Endovascular treatment of Multiple Sclerosis: recent evidences. F. Clarençon

14h00: Angioplasty/stenting in the treatment of cervical and intracranial  
atheromatous lesions

Chairmans: A. Moreno, A. Biondi

- Carotid stenting: what's new?
- Place of intracranial stenting after the final results of SAMMPRIS: E. Houdart

14h30: Angioplasty/stenting: cases presentations

Chairmans: J. Berge, MT Sola Martinez

15h00: Dural fistulas, Miscellaneous: cases presentations

Chairmans: R. Anxionnat, C. Cognard

16h00: Closing remarks: C. Cognard, L. Pierot
