**Virtual Surgical Planning for Craniomaxillofacial Surgery: Precision
medicine for the twenty-first century patient**

Speaker: R. Bryan Bell

Curriculum Vitae: R. Bryan Bell, MD, DDS, FACS

Medical Director (Oral, Head and Neck Cancer Program and Clinic, Providence Cancer Center, Providence Portland Medical Center)

Attending Surgeon(Trauma Service/Oral and Maxillofacial Surgery Service,Legacy Emanuel,MedicalCenter)

Affiliate Professor (Oregon Health and Science University)

Dr. Bell is an oral and maxillofacial surgeon who specializes in the comprehensive surgical management of head and neck cancer and craniomaxillofacial deformity. His training includes a dental degree from Creighton University, a medical degree from the University of North Carolina at Chapel Hill, and fellowships in head and neck oncologic surgery and craniomaxillofacial trauma. He is currently the Medical Director of the Oral, Head and Neck Cancer Program and multidisciplinary clinic at the Providence Cancer Center in Portland, Oregon; Attending Surgeon on the Trauma Service/Oral and Maxillofacial Surgery Service at Legacy Emanuel Medical Center; and has an appointment as Affiliate Professor at Oregon Health and Science University.

Dr. Bell's clinical interests are focused on head and neck oncologic surgery and reconstructive cranio-maxillofacial surgery, with a particular emphasis on oral and oropharyngeal tumors, orbital surgery and skull base surgery. He has pioneered technological advances in the field of 3-D computer planning and intraoperative guidance to achieve optimal oncologic and reconstructive outcomes. He is one of the few U.S. surgeons with extensive experience with sentinel lymph node biopsy for oral cancer, and was among the first surgeons on the west coast to perform transoral robotic surgery (TORS) for head and neck cancer.

Dr. Bell's current research endeavors are focused on collaboration with translational immunologists at the Earle A. Chiles Research Institute in the Providence Cancer Center to develop innovative treatment strategies that trigger the immune system to fight oral, head and neck cancer.

Dr. Bell has published more than 100 scientific articles and textbook chapters and is co-author of the textbook *Current Therapy in Oral and Maxillofacial Surgery*. He is on the editorial boards of the Journal of Oral and Maxillofacial Surgery and the International Journal of Oral and Maxillofacial Surgery, and is Editor-in-Chief of the AAOMS OMS Knowledge Update. Among his many honors, he is a recipient of the William F. Harrigan Award for major contributions to oral and maxillofacial surgery.
