

FIRST ANNOUNCEMENT

ROME
November 18th/20th - 2015
Palazzo Colonna

PLACE 2015

Dear all,

indeed, let us just welcome you to the evolution of ACE!

Yes, because after five editions, ACE turns into **PLACE2015**: the Platform of Laboratories for Advances in Cardiac Experience.

First of all, we would like to introduce our joint Presidency to all of you with mutual consideration and pride.

An Event that turns into a **Platform**, a dynamic “place” that interacts in both time and space within our scientific community.

Laboratory, namely a multidisciplinary whole of diverse knowledge, experimentally exchanging views with its own target, looking at the several **Advances** we live and witness daily, among the different scenarios of the **Cardiac Experience**.

A project as ambitious as it's prestigious, eventually taking the shape of **Place WELCOME, Place TRAININGS, Place FOLLOW-UP**, that we would try and summarize through these concise pages, hoping to have you as its protagonists.

Leonardo Calò

Fiorenzo Gaita

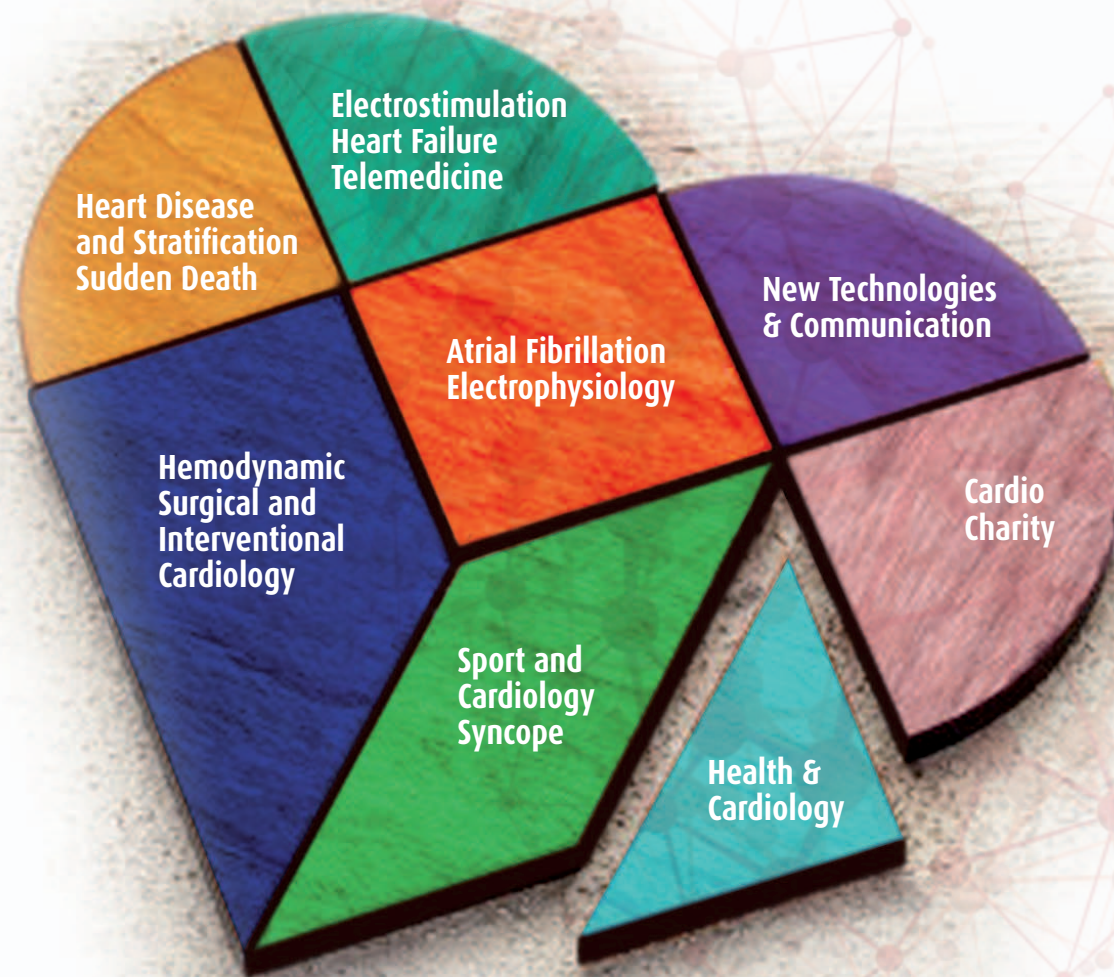

Leonardo Calò
*Director FF UOC
Cardiology
UTIC and
Arrhythmology
Policlinico Casilino
Rome, Italy*

Fiorenzo Gaita
*Director of the
Department of
Cardiovascular S.C.
University Cardiology
AOU Molinette
Turin, Italy*

PLACE TOPICS

- News on the treatment of heart failure
- Electrostimulation
- Atrial fibrillation therapy
- Ablation of atrial fibrillation
- Ablation of ventricular arrhythmias
- Interventional
- Hemodynamic
- Multidisciplinary management of organ damage prevention
- Risk stratification and non-invasive pharmacological therapy of heart failure
- Chronic heart failure therapy
- Multidisciplinary management of heart failure patients
- Clinical genetics
- Imaging in the arrhythmias therapy
- Pharmacological therapy in sudden death prevention
- Therapy of supraventricular arrhythmias
- Stratification and prevention of sudden death risk
- Heart diseases
- Medical ethics in cardiology and "cardiocharity"

- Telemedicine and remote monitoring of implantable devices
- Cardiology in sports
- Syncope
- Pharmacological therapy of ischemic heart disease
- Emergency cardiology
- Clinical arrhythmology
- Prevention of thromboembolic risk in atrial fibrillation
- Electrocardiography
- Echocardiography
- Multimodality imaging
- New technologies in cardiology
- Health economics in cardiology
- Imaging and biomarkers in heart failure
- How to reduce non-responders in cardiac resynchronization therapy
- Cardiac rehabilitation in heart failure
- Cardio-oncology
- Arrhythmias during pregnancy, in paediatrics and in congenital cardiomyopathies
- Cardiac surgery
- Performance and removal of electro-catheters

PLACE WELCOME

Palazzo Colonna,
a place where to feel free to meet each other and
exchange opinions, surrounded by an atmosphere
of taste and beauty.

PLACE TRAINING

A place where to tell, listen, share objectives and identify needs.
The congress' schedule also includes:

- **SYMPOSIA**
- **MEET THE EXPERTS**
- **LECTURES**
- **MINI-COURSES**
- **INTERACTIVE CLINICAL CASES**
- **LIVE IN A BOX**

PLACE FOLLOW UP

A place that never closes, all the year through – thanks to the exclusive Digital Platform.

Tools:

- **iACE**
The app of PLACE, conceived as a scientific documents archive, built on both the “physicians” and the “patients” channel.
- **WEB**
www.ace-web.org
- **WEBINAR**
Courses with leading experts
- **E-LEARNING**
Distance learning and videoconferences

PLACE INFO

CONGRESS VENUES

Palazzo Colonna

Piazza SS. Apostoli, 66 – 00187 Rome
