TRAINING ON ANATOMICAL
SPECIMEN

GENERAL INFORMATION

WRIST ARTHROSCOPY has been used for 20 years as a diagnostic test. Over the last 10 years, we have seen dramatic developments in its therapeutic application. Wrist arthroscopy is an important skill for all hand surgeons, exactly in the same way as shoulder and knee arthroscopy is crucial for orthopedic surgeons. This difficult technique has to be taught using cadavers and specific instrumentation so that surgeons learn arthroscopic techniques in a stepwise fashion.

////////////////////////////////////
2013

FEBRUARY 22 AND 23

BASIC COURSE

This course has 34 participants working on 17 surgical tables supervised by more than 14 European experts in this field, i.e. 1 expert for 2 tables. Each table is fully equipped with a camera of 2.4 mm Storz attached to a video system. Each video system is connected to the course director's table, performs live demonstrations before participants start the procedures themselves. This course is intended for all surgeons interested in hand surgery and in particular in wrist surgery. Attending this course should allow participants to practice wrist arthroscopy proficiently and safely.

NOVEMBER 29 AND 30

ADVANCED COURSE

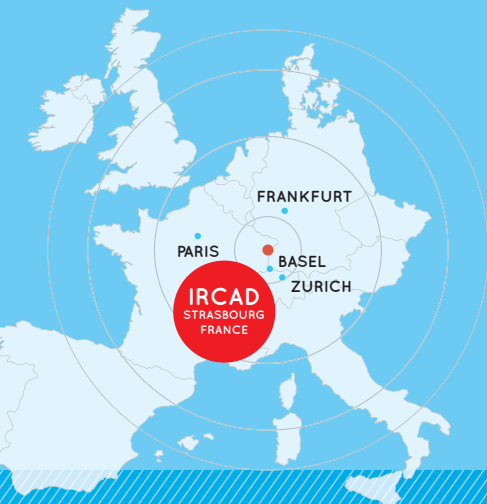

This course has 34 participants working on 17 surgical tables supervised by more than 14 European experts in this field, i.e. 1 expert per table. The table will be fully equipped with a camera of 2.4 mm Storz attached to a video system and the instrumentation required. The advanced course is intended for all those who have experience in wrist arthroscopy as well as for those who have already attended the basic course. It enables the participant to carry out more sophisticated techniques with the help of international experts. Teaching is both theoretical and practical and there is a high expert to participant ratio.

TRAINING ON **WWW.WEBSURG.COM**

Websurg is a free access website dedicated to education in minimally invasive surgery and accessible in 6 languages (French, English, Spanish, Japanese, Chinese, Portuguese).

CME ACCREDITATION AND COURSE ENDORSEMENT

All Courses are accredited by the European Accreditation Council for Continuing Medical Education (EACCME) to provide CME activity for medical specialists in their home European Country.

Every EITS course is designated as meeting the criteria for the American Medical Association (AMA) Physician's Recognition Award (PRA) Category 1 Credit(s)™. Physicians may apply to convert EACCME credit into AMA PRA Category 1 credit™.

The IRCAD/EITS courses meet the guidelines established in the "SAGES Framework for Post-Residency Surgical Education and Training" and are endorsed by the Society of American Gastrointestinal Endoscopic Surgeons.

EITS courses have been endorsed by the European Association for Endoscopic Surgery (EAES).
