

Europe AF

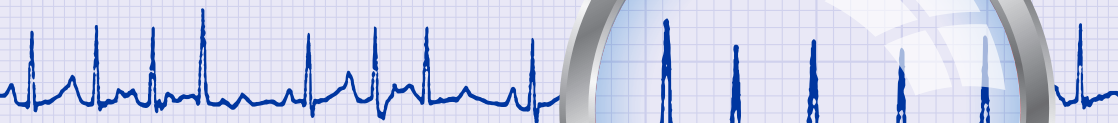

9th Annual Conference

Monday 7th - Tuesday 8th November 2016

NEW VENUE The Tower Hotel, London UK

(positioned alongside the River Thames with an outstanding view of Tower Bridge)

The goal of Europe AF 2016 is to present contemporary knowledge and understanding of the pathophysiology and treatment of Atrial Fibrillation to a diverse audience of medical professionals so that they will understand:

- How to investigate patients suspected of suffering from AF
- When to start and how to choose drug therapy for AF
- When and how to anticoagulate and reduce stroke risk in patients with AF
- How to choose treatment that is appropriate for each individual AF patient
- When to refer patients for AF ablation
- How to perform AF ablation safely and effectively
- The various options for mapping and ablating AF
- The role of new therapies for AF

Conference Directors:
Riccardo Cappato, Milan Italy
and D. Wyn Davies, London UK
