CARDIOLOGY®

A doctor in a white coat and blue tie, with a stethoscope around their neck, is holding a red heart in their right hand. The background is a soft-focus image of the doctor's torso and the heart they are holding.

Welcome

Dear Colleagues and Friends,

The Working Group of Interventional Cardiology in the Lebanese Society of Cardiology (LSC) is organizing the 6th Lebanese Course on Revascularization (LCR), which will be held on December 2nd to the 5th, 2015.

This course is now a well-established meeting focused on our commitment to a high level of educational and scientific activities in Lebanon. Through this course, the LSC aims to develop a fundamental reference in interventional cardiology across the region. The Lebanese Course on Revascularization 2015 will deliver a rich program supported by renowned International and Regional Faculty. LCR will provide coverage on the latest and most critical topics in Interventional Cardiology related to coronary artery disease and structural heart disease.

Live transmission sessions will be one of the most exciting features of this meeting. They are scheduled to take place from at least 3 eminent cardiology centers in France. The interactive course is designed to share our experience, shed light on the latest data and clinical trials in endovascular interventions (*coronary, vascular and valvular*), and to jointly discuss the emerging therapies in the field of cardiovascular medicine.

You are all invited to participate in this very exciting meeting.

We welcome you all in Beirut.

President of the Lebanese Society of Cardiology - **Dr. Sobhi Dada**

Chairman of the Working Group of interventional Cardiology - **Dr. Joseph Elias**

Chairman of the working group of interventional Cardiology - **Dr. Fadi Abou Jaoudé**
