Welcome

On behalf of AOCMF and your local and international faculty, I would like to welcome you to this AOCMF course.

AOCMF is a worldwide multi-specialty community that serves as the voice and professional resource for craniomaxillofacial trauma and reconstruction. Our organization creates a forum for specialists who have common interests and enthusiasm in this field. It is our goal to encourage and inspire younger surgeons, such as residents, fellows, and early practitioners to pursue fulfilling careers in our field.

Education has always been a major pillar in AOCMF.

Currently, more than 2500 surgeons participate in over 80 AOCMF courses worldwide per year. AOCMF Education is committed to remaining in the forefront of education and new developments as we strive to improve your educational experience with us.

We hope that your experience with us over the next few days will result in the acquisition of new knowledge, skills and understanding, which will translate into an improvement in the care that you are able to give your patients.

We also hope that, as a result of this course, you will wish to develop a longer term relationship with AOCMF and become a member of our community. Make this organization yours by bringing in your opinions and ideas. Enjoy the camaraderie of our network and help us maintain and expand the preeminent position that AOCMF enjoys worldwide.

Yours sincerely

Warren Schubert
Chairman AOCMF International

Goal of the course

This course with practicals on human specimens is designed to present and teach all essential operative procedures in oral and maxillofacial surgery.

We also offer you the chance to practice under expert guidance.

Course objectives

On completion of this course the participant will:

- know how to perform the most relevant surgical approaches safely
- be able to carry out the most essential operative procedures step by step
- develop and/or enhance their surgical skills in a variety of operative techniques in oral and maxillofacial surgery
- gain an improved understanding of complex anatomical structures

Course description

Course Concept: Practical on human specimens, Lectures

This three-day intensive course trains on fresh frozen human specimens.

Each practical session will include a step by step introduction followed by an on-site demonstration.

Participants will then perform the same technique on human specimens.

2 participants per human specimens.

Target audience

- Maxillofacial Surgeons
- Plastic and reconstructive surgeons
- Otolaryngologists
- Surgeons of related disciplines
