INVITATION

10th CROATIAN CONGRESS on EXTRACORPOREAL CIRCULATION TECHNOLOGY WITH INTERNATIONAL PARTICIPATION

May 15th – 18th, 2014
ZADAR – CROATIA

Dear Colleagues,
The Croatian Society of Extracorporeal Circulation Technology is honoured to invite you to the jubilary 10th Croatian Biannual Congress with International participation to be held in Zadar, Croatia, May 15-18, 2014.

Situated in the heart of the Adriatic, Zadar is the urban center of northern Dalmatia. Due to its 3.000 year old history and rich cultural heritage it is considered as the "open-air museum". Monuments and remains from Roman period as well as from different periods of Christianity can be found in every stone around the city.

Congress Hotel "Kolovare" is located near the historical sights, in a peaceful and picturesque part of the city, along the promenade of the same name overlooking the city harbour and island. Zadar is situated in the idyllic surrounding of natural beauty and overwhelming sand beaches, and in its proximity there are four worldwide known national parks of exceptional natural beauty: Plitvice lakes, Paklenica mountain, Krka waterfalls and Kornati archipelago.

Climate is typical Mediterranean with warm summers and mild winters. The summer season lasts for the six months from May to October, and the temperatures in Zadar will head well over 20 °C during this time of year.

Getting to Zadar is easy. Depending on your departing location you can reach Zadar by air, land or sea. Even though the airport is small it is contemporary (9 km distance from the city center) and connects Zadar with Zagreb, the capital of the Republic of Croatia, and various European cities.

There is a regular bus line from airport to central bus station in Zadar.

Participants are encouraged to inform the Organizing committee by email about their landing since a shuttle from airport to the Congress Hotel might be provided.

The Congress is an unique opportunity to learn and to share innovative and best practice, ideas and experiences with colleagues from all over the world. Wherever you work, take this opportunity to break away from your daily routine, in order to discover new approaches and to get acquainted with the lessons learned. But most of all to network and to return home with new knowledge, insight, ideas and newly motivated to your work and colleagues.

Approval of accreditation will be requested again from the The European Board of Cardiovascular Perfusion (EBCP) and from the American Board of Cardiovascular Perfusion (ABCP) for the award Continuing Education Credits.

On behalf of the Organizing Committee, it is both my honour and great pleasure to welcome all participants of the 10th CROSECT Congress, which we hope will be a scientifically and socially rewarding, memorable and enjoyable experience.

I also wish to thank you for your continious interest and support and being with us since our first Congress.

Welcome to Zadar

President of the Organizing Committee
Dalibor Zovko
