

**University Medical Center
Utrecht**

Utrecht, October 14th, 2013

Dear representative,

Herewith we would like to inform you about the sponsorship opportunities concerning the

„Second European Symposium on 3D Rotational Angiography in Congenital Heart Disease“

which will be held in Utrecht, The Netherlands on January 31st / February 1st 2014.

3D Rotational-Angiography (3DRA) represents the most innovative and sophisticated technique available in heart catheterization in adult and paediatric patients. With its astonishing image-quality it offers great benefit directly in the cath-lab during interventions. State-of-the-art percutaneous therapy as stent-implantation and pulmonary or aortic valve replacement (PPVI and TAVI) are guided by and best outcome is guaranteed by using this imaging facilities.

*Second European Symposium on
3D Rotational Angiography in
Congenital Heart Disease*

Children's Heart Center Utrecht, The Netherlands

January 31st - February 1st 2014

www.kinderhartcentrum.nl

International well-known speakers and outstanding interventionalists as Evan Zahn (Los Angeles), Elchanan Bruckheimer (Petah Tikva, Israel), Shak Qureshi (London, president of the AEPC), George Ballard (Leeds), Andreas Eicken (Munich) and Mario Carminati (Milano) joined our first symposium as main speakers and chairmen and most of them will do the same in 2014.

Meanwhile we were accredited as Siemens' Global Reference Centre in 3DRA.

With our first Symposium on February 1st/2nd 2013 we were able to attract colleagues from Canada, Chile, Russia, Sweden and other countries to join this first unique meeting in Utrecht.

You are welcome to view the video-documentation of our previous meeting using the following link :

Sponsorship Opportunities

We are pleased to offer different sponsorship opportunities to companies with an interest in paediatric and congenital cardiology. The event attracts cardiologists specialised in paediatric and adult congenital heart disease, cardiovascular surgeons and radiologists from across Europe. It will offer excellent business opportunities to participating companies to build presence and gain brand recognition internationally.

Your company can use this opportunity to inform physicians about your high-tech products and most recent developments associated with interventional devices, technique, imaging or medical treatment.

Options for sponsoring

Sponsorship options are based on three categories: bronze, silver, gold.
Below you will find the specific proposal related to each category.

	Bronze 2000,- €	Silver 4000,- €	Gold 6000,- €
