

PCR 2014

london valves

First announcement

www.pclondonvalves.com

PCR London Valves is the official meeting of the European Association for Percutaneous Cardiovascular Interventions (EAPCI).

28th - 30th September, 2014
London, United Kingdom
The Queen Elizabeth II Conference Centre

Welcome!

Martyn Thomas

Stephan Windecker

PCR London Valves
Course Directors

The mission of PCR is to serve the needs of each individual patient by helping the cardiovascular community share knowledge, experience and practice.

PCR London Valves is a Course specifically designed to update you on a very practical level on transcatheter therapies for valvular heart disease. Our role is to accommodate and provide a venue for heart teams to exchange and learn.

We invite all members of the heart team performing transcatheter valve therapies to come and take part in the Course together. This Course is made By & For you.

As we truly want to benefit from one another's experience, a great part of the programme will be designed by the audience. We believe it's the best form of learning in this field.

LIVE demonstrations will be a central component of the Course. Operators from London, Bonn and Bern will share their decision-making processes with a patient-centred approach.

This year again, your abstract and clinical case submissions will build numerous sessions. Don't miss this opportunity to step on stage!

You are PCR London Valves' essential source of education!

Highlights of PCR London Valves 2013

- › **1,650** active participants
- › **1,106** medical staff
- › **507** exhibitors
- › **61** participating countries
- › **249** clinical case and abstract submissions
- › **8 hours** of LIVE demonstrations
- › **205** faculty members and presenters

"Excellent meeting with a brilliant faculty. Fantastic programme that was instructive and informative"

"Very interesting talks and live cases - excellent educational content"

"Live cases were excellent!"

"Very good meeting, interesting matters, excellent opportunity to learn from worldwide KOL physicians in the front line of TAVI and to update myself regarding up-to-date results of available TAVI devices and new products in the pipeline"

New this year: pre-Course Imaging Day

On Sunday 28th September and prior to the official opening of the Course, the PCR London Valves Course Directors are pleased to invite you to join this new endeavour.

This pre-Course is developed:

- To acknowledge that imaging is a critical step in the assessment and treatment of complex patients (TAVI & mitral)
- To attract the specialists of imaging in cathlabs/hybrid OR as well as to promote the heart team approach

A group of 4 recognised experts in imaging, well versed in the specifics of valve intervention have built this programme:

- Mark Monaghan, United Kingdom
- Jeroen J. Bax, Netherlands
- Patrizio Lancellotti, Belgium
- Nicolo Piazza, Canada

**Join us from 12:00 to 17:00 on Sunday 28th September 2014,
at the Queen Elizabeth II Conference Centre**

More information soon on www.pcrlondonvalves.com

NEW! The Great Valve Debate is coming to London!

The Great Valve Debate will be the session
not to miss at PCR London Valves 2014.

Inspired by the successful EuroPCR Great Debate, this session will address burning issues in valvular heart disease interventions.

A few weeks ago, the Board of Directors proposed 5 topics to you via an online consultation.

One topic had to be selected amongst...

- Does the improvement in TAVI outcomes justify treatment of low risk patients?
- Paravalvular leak: no longer an issue?
- Is it time to “simplify” the TAVI procedure to improve cost-effectiveness?
- Is there a need for further randomised trials of TAVI?
- How many TAVI devices do you need?

You have massively chosen:

Does the improvement in TAVI outcomes justify treatment of low risk patients?

See you in the Main Arena next September!

Live centres

In 2014, PCR London Valves will transmit LIVE from...

- › **St Thomas' Hospital**, London, United Kingdom
- › **Bern University Hospital**, Bern, Switzerland
- › **Medical Clinical II, University of Bonn**, Bonn, Germany

Free and unlimited access to the full content of PCR London Valves, a Course built By & For you

Discover or experience again online:

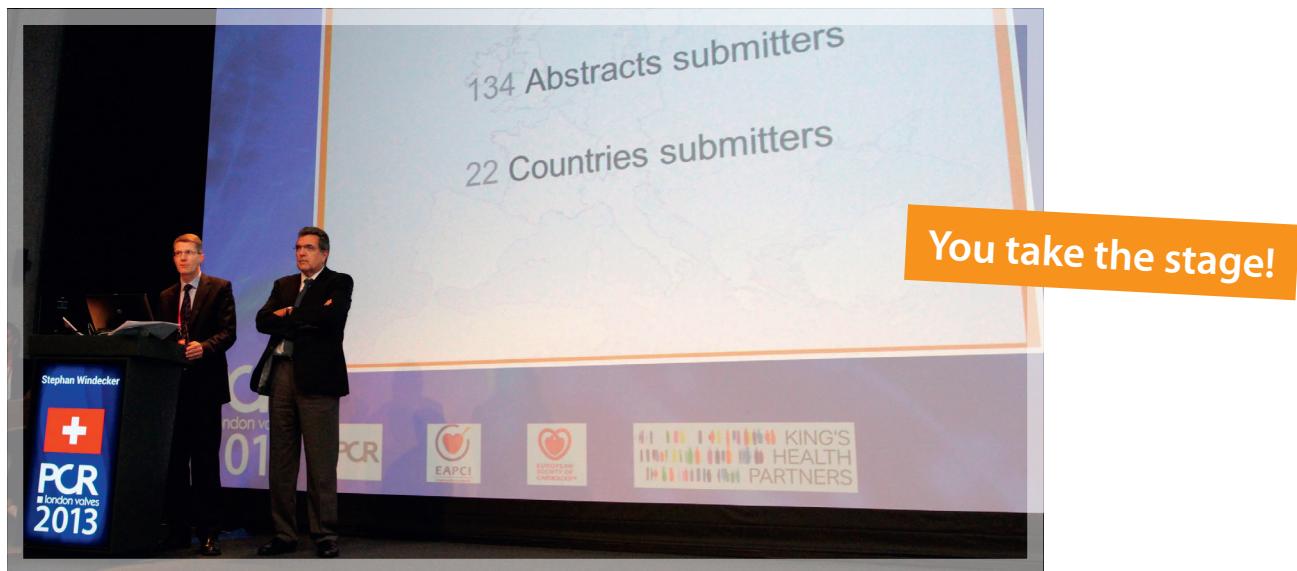

- LIVE demonstrations
- Educational sessions
- Interactive discussions

Call for submissions calendar

Join your peers in the “call for-based” sessions and activities. Your daily practice is that of many others! Express your views, understand the differences, be challenged and do challenge as well, and discover what you have in common. A unique way to benefit from each other’s skills and experience.

Call for... Abstracts

Closing 29th April, 2014

What?

Submit a 3,500 character text in 3 parts: Aims, Methods & Results, Conclusion.

What for?

Selected abstracts will be presented during thematic sessions in London and published in a special issue of EurolIntervention Journal.

An additional selection of abstracts will be displayed as e-abstracts on dedicated computers in the exhibition area for free consultation.

Who?

Open to the whole community!

Who won in 2013?

Six-month outcomes for the first 60 patients in a clinical study of a repositionable second generation device for transcatheter aortic valve implantation

I. Meredith, Monash Medical Centre, Clayton, Victoria, Australia

Call for... Clinical cases

Closing 29th April, 2014

What?

Submit your most educational & interesting cases and complications in PowerPoint format.

What for?

Selected cases will be presented either in thematic sessions or in the Interactive Case Corner, where authors are invited to exchange views with other participants on a wide variety of topics, in a relaxed and friendly environment, and with guidance from on-site facilitators.

Who?

Open to the whole community!

Who won in 2013?

Annulus perforation after Edwards TAVI managed successfully with the CoreValve prosthesis
S. Yücel, Bonn, Germany

Call for... Innovation

Closing 29th April, 2014

What?

Submit your innovative technologies up to the stage of first-in-man experiences in PowerPoint format.

What for?

The companies or physicians whose submissions were selected will be invited to orally present their work.

Who?

NEW! Open to the whole community! If you, as a physician or company, have developed technologies up to the stage of first-in-man experience, now is the right time to unveil them.

the stage!
