AOTrauma Faculty Education Program (FEP)

Home to **Trauma & Orthopedics**

Value statement

AOTrauma is committed to improve patient care outcomes through the highest quality education. We strive to combine the right knowledge and surgical skills that empower the orthopedic and trauma surgeons to put theory into practice and to improve fracture management for the benefit of the patient.

Goal of the program

The AOTrauma Faculty Education Program (FEP) is designed to train AOTrauma faculty by improving their educational skills, knowledge, and expertise. In order

to achieve this we give participants the opportunity to explore a variety of teaching methods. This program concentrates on practical skills rather than on theory.

Learning objectives

After participation in this program, in regard to teaching methods and techniques, learners will be able to:

- give a lecture
- lead a discussion group
- instruct at the table in practical exercises

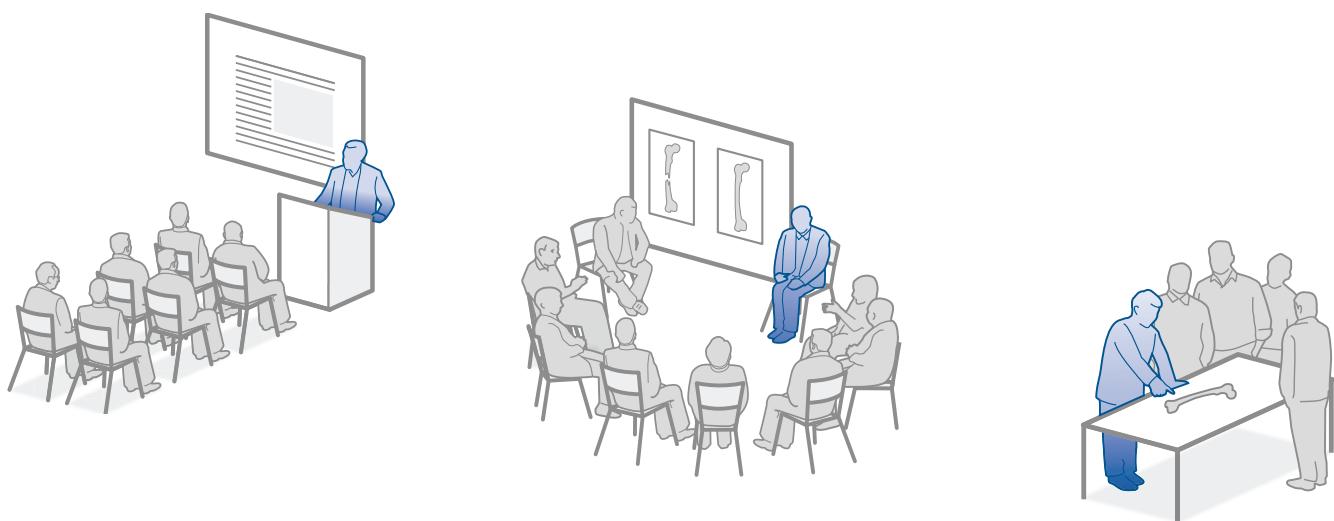

In regard to working with learners, learners will be able to:

- motivate learners
- encourage interaction with and among learners
- give appropriate feedback about performance

In regard to using assessments and outcomes related information, learners will be able to:

- use information about learners, their needs and cultural context in the educational process
- work with outcomes in teaching strategies
- set reasonable expectations of a teaching learning session
- evaluate and improve their own teaching performance

In regard to all of the above, learners will also be able to manage time and logistics as part of their educational strategies.

Programme description

This program is designed to help participants prepare for success as faculty and consists of:

1. Online preparations—five weeks prior to the live event

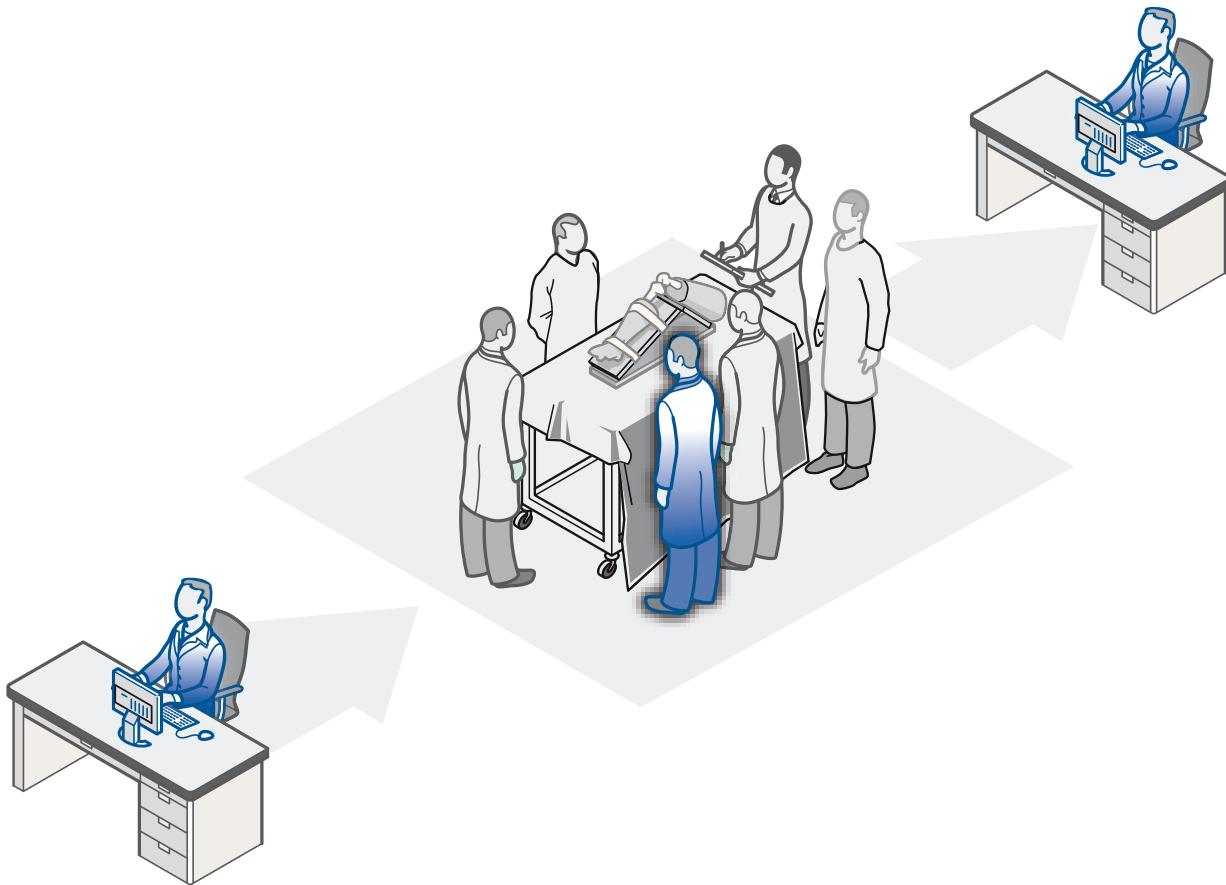

These preparations will start with a self-assessment. During these five weeks participants will be required to complete online self-study and engage in online discussion. The intention is to give a foundation and reach a common understanding of how adults learn, giving a lecture, running practical exercises, and leading group discussions. Participants are encouraged to use the platform to get to know their fellow participants and start interacting with each other.

2. Live event—one and a half day

The face-to-face event begins with an interactive morning session that establishes an understanding of quality education at AOTrauma courses. Each participant will give a 7-minute presentation, run a 10-minute discussion group, and should prepare for a practical exercise demonstration. Following these presentations, discussion groups, and practicals, the participant will receive detailed feedback from the group and the faculty/educator. The presentation session including feedback will be videotaped to improve the participants' teaching technique. The videos will be handed out to the participants at the end of the event on a DVD.

3. Online follow-up

These activities start with the postcourse self-assessment after the event and ongoing online discussion. An assessment during participants first live teaching event is required.

Certificate

All three parts of the program are mandatory. We expect participants to do the online activities in each session. During the live event, they need to run a lecture, a small group discussion, and a practical exercise. If participants have completed all of these requirements, they will receive their FEP certificate.

Event information

Expenses/Reimbursement

AOTrauma will cover the following expenses:

- accommodation and meals
- course fee

Participants will be expected to cover their own travel expenses.

Please note that no per diems will be paid to participants of the FEP.

Accreditation

AOTrauma Courses are accredited for continuing medical education (CME) programs. The number of credit points or hours varies from country to country. The final information and number of credit points will be distributed with the course certificate.

Intellectual property

Course materials, presentations, and case studies are the intellectual property of the course faculty. All rights are reserved. Check hazards and legal restrictions on www.aotrauma.org/legal.

Recording, photographing, or copying of lectures, practical exercises, case discussions, or any course materials is absolutely forbidden.

The AO Foundation reserves the right to create photo images and video content during the course of this event and use this material in electronic and print format.

No insurance

The course organization does not take out insurance to cover any individual against accidents, thefts, or other risks.

Mobile phone use

Mobile phone use is not permitted during educational activities.

Please be considerate of others by turning your mobile phone off.
