63d ESCVS

International Congress of the European Society for Cardiovascular and EndoVascular Surgery

APRIL 24 - 25 - 26 - 27

Welcome

Dear Colleagues, Dear Friends and Guests,

It is a great honour to host the 63rd International Congress of the European Society for Cardiovascular and Endovascular Surgery (ESCVS)

in France, the birthplace of vascular surgery.

ESCVS is the oldest European Society devoted to cardiac and vascular surgery, with origins dating back to 1950. Our congress centers on cardiovascular surgical practice and is at the frontier of cardiac and severe vascular disease.

Endovascular procedures are becoming more and more popular and the ESCVS Congress is the only meeting that provides training for participants in both cardiac and endovascular medicine.

The members of our scientific program committee are internationally renowned leaders in the field and each brings a different perspective, as seen in our speaker faculty and the variety of topics addressed at the meeting.

This diversity is also a meaningful reflection of treatment procedures of cardiovascular patients, not only across Europe, but also from around the world, particularly in emerging countries.

Our next edition takes place in Nice, 24-27 April 2014. At the crossroads between France and Italy, Nice features spectacular natural surroundings and a mild Mediterranean climate. It is very easy to get to, with the second busiest airport in France and direct flights to 90 destinations in more than 40 countries.

We invite you to read through our congress themes and mark your agendas now for **ESCVS 2014.**

See you in Nice next April!
