Programme at-a-glance

NEW! Pre-Course Programme

Wednesday 23rd January, 2013

Practical PCI course

Objectives:

- ➤ To learn how to do basic PCI
- To learn the different techniques to approach the cases

ROOM 2

____ 09:30-10:35 _____

Practical tips in diagnostic and PCI techniques

- Overview of practical PCI Course
- ▶ Interpreting the coronary angiogram
- > Choice and manipulation of diagnostic and guiding catheters
- > Choice and manipulation of guide wires
- ▶ Anchoring and mother and child catheter techniques
- > Strategies in PCI
- Discussion

____ 10:50-11:45 _____

Practical aspects of non left main bifurcation stenting

- Overview
- > Technical considerations in bifurcation stenting
- Culotte
- > Crush/ mini crush
- > T and TAP Stenting
- Discussion

____ 11:50-12:45 ____

Left main stenting

- Overview
- Ostial left main stenting
- > Stent cross over
- Distal bifurcation stenting
- Trifurcation stenting
- Discussion

... Wednesday 23rd January, 2013 - Room 2

____ 13:30-14:25 _____

AMI interventions

- ➤ Overview
- ▶ How to do thrombectomy and distal protection
- Anticipating complications
- ▶ Use of new antiplatelet drugs/2B3A inhibitors
- > Management and prevention of no reflow
- Discussion

____ 14:30-15:15 _____

Transradial and transfemoral access

- Overview
- > How to access the radial artery
- > Choice of guiding catheters
- Management of vascular complications from femoral and transradial approaches
- Discussion

____ 15:30-16:25 _____

Imaging and functional lesion assessment

- ➤ Overview
- > How to do a FFR
- ➤ Complex situations for FFR interpretation
- > IVUS tips and tricks in interpretation
- > ABC of OCT
- Discussion

____ 16:30-17:20 _____

Complications management

- > Stent retrieval
- > How to cross uncrossable lesions
- ▶ How to perform rotablation
- > Approach to renal failure
- Discussion

____ 17:25-18:20 _____

Adjunctive devices and techniques

- Overview
- > Issues in management of restenosis
- Cutting balloon
- > Use of drug-eluting balloon
- Starting balloon aortic valvuloplasty
- Discussion

Thursday 24th January, 2013

MAIN ARENA

08:30-11:55

PCI using new technologies

Objective:

To understand the curent use of new devices (bioresorbable scaffolds, DEB) and other new stents

_08:30-09:35 Welcome and LIVE demonstration from the National Heart Centre Singapore

- > Welcome
- ▶ LIVE demonstration from the National Heart Centre Singapore
- > Discussion of the LIVE case

09:35-09:45 Focus on BVS - Part 1

Case selection for BVS

09:45-10:30 How should I treat?

- Case presentation
- > How would I treat?
- > How would I treat?
- > How did I treat?
- Discussion
- > Consensus

10:30-10:50 Focus on BVS - Part 2

- > BVS: Asian perspective
- > Long-term outcomes and new BVS

_10:55-11:50 LIVE demonstration from the National Heart Centre Singapore

- ▶ LIVE demonstration from the National Heart Centre Singapore
- > The ten most important things to know about drugeluting balloon
- Discussion

__11:50-11:55 **Wrap up**

What we have learnt today on new coronary technologies

Thursday 24 th January, 2013 - Main arena
11:55-12:10
Opening ceremony
12:15-13:55
Symposium
Lunch industry-supported session with LIVE demonstration
14:00-15:00
Late breaking trials

15:00-17:50

Complex left main bifurcation

Objectives:

- To understand the specific indications for left main bifurcation PCI in the Asia-Pacific region
- To learn the different left main bifurcation strategies
- To understand the latest techniques and technologies in the field of complex left main bifurcation

15:00-16:00 LIVE demonstration from India

_16:05-16:45 How should I treat?

- Case presentation
- > How would I treat?
- > How would I treat?
- ➤ How did I treat?
- Discussion
- ▶ Consensus

16:45-17:45 LIVE demonstration from India

_17:45-17:50 **Wrap up**

What we have learnt today on complex left main bifurcation

____ 18:00-20:00 _____

Symposium

Dinner industry-supported session

... Thursday 24th January, 2013

ROOM 2

08:30-09:50

Renal denervation: tools of the trade

Objectives:

- To understand the indications and evidence for renal denervation in the Asia-Pacific region
- > To understand the latest techniques and technologies in the field
- Introduction
- > Lessons from animal models
- Clinical trial data and long-term outcomes
- > Selection criteria
- > Technical aspects and practical tips
- ▶ 2nd generation of renal denervation devices on the market
- > Applications beyond hypertension management
- Discussion
- Conclusion

____ 09:55-11:55 _____

TAVI

Objectives:

- > To review the latest evidence for TAVI
- > To understand the latest techniques and technologies in the field
- Session details to be advised

____ 12:15-13:35 _____

Symposium

Lunch industry-supported session

14:00-17:55 Non-coronary transcatheter interventions

Objectives:

- To learn about patient selection, techniques and remaining issues for TAVI
- To learn about indications and techniques for LAA closure
- > To learn about the role of renal denervation for the treatment of resistant hypertension

14:00-15:00 LIVE demonstration from the National Heart Centre Singapore

- ▶ LIVE demonstration from the National Heart Centre Singapore
- Discussion of the LIVE case

... Thursday 24th January, 2013 - Room 2

15:00-15:30 Focus on TAVI

- ▶ TAVI for low or intermediate surgical risk patients
- ▶ How to prevent cerebral complications
- > What is on the horizon?

_15:35-16:35 LIVE demonstration from the National Heart Centre Singapore

- ▶ LIVE demonstration from the National Heart Centre Singapore
- Discussion of the LIVE case.

16:35-17:15 **How should I treat?**

- ▶ Case presentation
- > How would I treat?
- > How would I treat?
- ➤ How did I treat?
- Discussion
- ▶ Consensus

_17:15-17:55 LIVE demonstration from the National Heart Centre Singapore

- LIVE demonstration from the National Heart Centre Singapore
- Case presentation
- Discussion

18:00-20:00

Symposium

Dinner industry-supported session

ROOM 3

__ 08:30-10:00 _____

Abstracts session

Session comprising selected AsiaPCR/SingLIVE 2013 abstracts submissions

____ 10:05-11:55 _____

Complications forum

Session comprising selected AsiaPCR/SingLIVE 2013 clinical cases submissions

____ 12:15-13:35 ______

Symposium

Lunch industry-supported session

7	Γhursd	ay 24th	January,	2013 -	Room 3
---	--------	---------	----------	--------	--------

____ 13:45-15:45 _____

Clinical cases forum

Session comprising selected AsiaPCR/SingLIVE 2013 clinical cases submissions

____ 16:00-17:30 _____

Abstracts session

Session comprising selected AsiaPCR/SingLIVE 2013 abstracts submissions

____ 18:00-20:00 _____

Symposium

Dinner industry-supported session

ROOM 4

____ 08:30-10:00 _____

Objectives:

Nurses, technicians and radiographers forum - Part I

- To understand the key roles of cathlab professionals and team work in primary PCI for acute myocardial infarction
- To apply thrombectomy and the different medical treatment options
- To identify possible complications in primary PCI in acute myocardial infarction

____ 10:15-11:45 _____

Nurses, technicians and radiographers forum - Part II

Objectives:

- > To learn the technical aspects of the device preparations
- > To anticipate technical issues during PCI
- > To learn how to manage complications
- Introduction
- > Renal denervation: a new treatment for resistent hypertension
- > Hybrid operating theatre: new challenges for cathlab staff
- > Scrubbing in for TAVI procedure
- > Update on new techniques in invasive coronary imaging
- ▶ How to conduct and implement nursing research in the cathlab
- > Strategies to speak up for patient safety
- Discussion
- Conclusion

____ 12:15-13:30 _____

Symposium

Lunch industry-supported session

... Thursday 24th January, 2013 - Room 4

1	3:4	ŀ5-í	15	:40)

Experts focus sessions

- ▶ To showcase Asia-Pacific and international advances in interventional cardiology
- To provide a forum for presentation of individual centre's PCI excellence
- Stent complications
- ACS
- > Bifurcation and left main

____ 15:50-17:20 _____

Vietnam at AsiaPCR/SingLIVE

- ▶ How to retrieve a broken tip of IVUS catheter
- > How to perform mitral valvuloplasty through a big hole of ASD
- > Learning from my mistake
- > Lessons from coronary stent graft
- Device embolism: how to deal with?
- Lesson from a case of percutaneous renal angioplasty complication
- > To continue or to stop

Friday 25th January, 2013

MAIN ARENA

08:30-12:00

Use of transradial approach for complex lesions

- > To learn the current approach of TRI
- To understand how to overcome the challenges of transradial approach for the treatment of complex lesions

_08:30-09:30 LIVE demonstration from Chang Gung Memorial Hospital, Taiwan

- LIVE demonstration from Chang Gung Memorial Hospital, Taiwan
- > Discussion of the LIVE case

_09:30-10:20 Tips & tricks: how to overcome technical challenges with TRI

- Vascular access
- Difficult guider cannulations
- > Bypass grafts
- > Case presentations

_10:25-11:25 LIVE demonstration from Chang Gung Memorial Hospital, Taiwan

- LIVE demonstration from Chang Gung Memorial Hospital, Taiwan
- Discussion of the LIVE case

_11:25-11:55 Focus on bifurcation stenting with TRI

- Complex bifurcation stenting
- > CTO
- ▶ Rotablator

_11:55-12:00 Wrap up

 What we have learnt today on the use of transradial approach for complex lesions

____ 12:00-12:10 _____

Chien Foundation Lectureship

____ 12:15-13:55 _____

Symposium

Lunch industry-supported session with LIVE demonstration

... Friday 25th January, 2013 - Main arena

14:00-18:00	

Sharing experience on coronary chronic total occlusion with experts

Objectives:

- To learn and discuss pros and contra of the various techniques for complex coronary CTO
- To explain the selection criteria and use fo dedicated wires and other specific devices
- LIVE demonstration from University Malaya Medical, Kuala Lumpur, Malaysia
- > Discussion of the LIVE case
- > Antegrade approach: the latest techniques
- ▶ Retrograde approach: update on reverse CART technique
- ▶ LIVE demonstration from the National Heart Centre Singapore
- > Discussion of the LIVE case
- > Tips and tricks of selecting collateral channels
- Managing complications arising from the retrograde approach
- ▶ LIVE demonstration from University Malaya Medical, Kuala Lumpur, Malaysia
- > Discussion of the LIVE case
- > What we have learnt today on coronary chronic total occlusion

ROOM 2

___ 07:45-08:30 _____

Symposium

Breakfast industry-supported session

08:35-12:10

Invasive imaging and physiology (IVUS/OCT/FFR)

Objectives:

- > To appreciate the role of invasive imaging and physiology in PCI
- ▶ To learn image interpretation in complex scenarios
- > To understand the current limitations of these technologies
- > Session details to be advised

12:15-13:35

Symposium

Lunch industry-supported session

... Friday 25th January, 2013 - Room 2

1	3:45-14:45	

Cardiac & cerebral resuscitation

Objectives:

- > To understand the correlation of intervention and the technologies available
- To learn the current approach of cardiac and cerebral rescucitation
- ➤ The role of IABP in patients with ACS and cardiogenic shock in 2013
- ▶ Hemodynamic support in ACS and cardiogenic shock beyond IABP -Brain cooling for whom and how?
- ➤ Cooling for myocardial salvage in STEMI: an evolving concept?
- Discussion

14:50-15:50	

The most relevant trials

Session details to be advised

1	6:	()	0-	-1	8:	0()

Congenital heart interventions

Objectives:

- To showcase practical approach to complex congenital heart disease
- ▶ To share interventional techniques from different countries
- Session details to be advised

ROOM 3

07	:45-	-08:30	

Symposium

Breakfast industry-supported session

 08	:35	-1():()5

Clinical cases forum

Session comprising selected AsiaPCR/SingLIVE 2013 clinical cases submissions

1	O:	1()- i	П	1:1	10

Complications forum

Session comprising selected AsiaPCR/SingLIVE 2013 clinical cases submissions

Friday 25 th January, 2013 - Room 3
11:15-12:10
Innovation corner
Objective:To be informed about the pre-marketed devices in interventional cardiology
➤ Session details to be advised
12:15-13:35
Symposium Lunch industry-supported session
13:45-14:45
Abstracts session Session comprising selected AsiaPCR/SingLIVE 2013 abstracts submissions
14:50-16:50
Tips and tricks
Objectives:

To learn tips and tricks froms experts on how to avoid or resolve

> To learn how to improve manipulation of tools

Session details to be advised

____ 16:55-17:55 ______

Complications forum

Session comprising selected AsiaPCR/SingLIVE 2013 clinical cases submissions

ROOM 4

08:10-12:10 Transcatheter mitral valve interventions

Objectives:

- > To learn the techniques of transseptal puncture and PTMC
- To review the indications and evidence of MitraClip

_08:10-09:05 Transseptal with imaging guidance

- Introduction
- Anatomical variations
- > Complex transseptal with only angio guidance for PTMC
- Transesophageal echocardiogram guided transseptal puncture for device implantation
- Intracardiac echocardiogram/echocardiography guided transseptal for EP procedures
- Discussion
- Wrap Up

issues

... Friday 25th January, 2013 - Room 4

09:10-10:50 Percutaneous mitral valve repair

- Introduction
- Recorded LIVF demonstration
- > Update on clinical data
- > Patient selection: interventionalist
- Which patient would I refer for MitraClip
- MitraClip: avoiding complications
- > Case discussion: high anatomical risk case
- Surgical strategy
- Interventional strategy
- Discussion

10:55-12:10 Percutaneous mitral valvuloplasty

- Introduction
- General approach to PTMC
- Case presentation: concurrent antegrade transseptal Inoue-balloon mitral and aortic valvuloplasty
- > Case presentation: PTMC via internal jugular approach
- ➤ Case presentation: complications of PTMC
- Discussion
- Conclusion

12:15-13:35	
vmposium	

Lunch industry-supported session

____ 13:45-15:15 ____

India at AsiaPCR/SingLIVE

> Session details to be advised

____ 15:20-16:20 _____

EuroIntervention at AsiaPCR/SingLIVE

> Session details to be advised

____ 16:25-17:55 _____

Hong Kong at AsiaPCR/SingLIVE

With the collaboration of the Hong Kong College of Cardiology

Session details to be advised

Saturday 26th January, 2013

MAIN ARENA

High-risk PCI

08:30-12:10 Objectives:

- > To understand the current strategic approaches to high-risk PCI
- To understand how to integrate the new antiplatelet and antithrombotic agents in decision making in the Asia-Pacific region
- To understand the technical strategy for high-risk PCI patients

_08:30-09:30 LIVE demonstration from the National Heart Centre Singapore

- LIVE demonstration from the National Heart Centre Singapore
- Discussion of the LIVE case

_09:30-10:00 Focus on high-risk PCI

- ▶ Prasugrel and Ticagrelor: will it change our practice?
- Is there still a role for GP 2b3a inhibitors?
- > PCI in ACS patients with high bleeding risk

_10:05-11:05 Case presentations

- When should we think about hemodynamic support during PCI?
- > IABP assisted primary PCI
- > PCI with ventricular assist devices
- > ECMO assisted high-risk PCI
- Discussion

_11:05-12:05 LIVE demonstration from the National Heart Centre Singapore

- LIVE demonstration from the National Heart Centre Singapore
- Discussion of the LIVE case

_12:05-12:10 **Wrap-up**

> What we have learnt today on high-risk PCI

... Saturday 26th January, 2013 - Main arena

- 1	γ .1	F 1	17.1	
	7:1	5-1	1.51	

My most educational cases from the last month

Objectives:

- > To learn first hand from the experts on pitfalls and how to avoid them
- > To understand how to integrate different approaches and helps in decision making when faced with complications
- ➤ Case presentations

1	3:	15	-1	3:	45

Awards & closing ceremony

Awards given to the most educational abstract, clinical case and how should I treat?

ROOM 2

08:30-10:30

Transradial

Objectives:

- > To learn the current approach of TRI
- > To appreciate the new developments in TRI
- > Session details to be advised

 10	:3	0-	1	2:05	

Interactive case-based session

➤ Case presentations

General information

Pre-Course date

Wednesday 23th January / 9:30-18:20

Course dates

Thursday 24th January / 8:00-20:00 Friday 25th January / 8:30-18:00 Saturday 26th January / 8:30-13:45

Course venue - NEW LOCATION!

Sands Expo and Convention Center
10 Bayfront Avenue, Singapore 018956
www.marinabaysands.com/Singapore-Conventions/

Registration

You can register easily on the website. Connect now!

Official language

The official language of the Course is English.

Housing

Reserve a room now. Different types of hotels are available at preferred rates. More information on the website.

Invitation letter

Upon request, we shall provide a letter of invitation to facilitate travel and visa arrangements.

THE PCR-EAPCI TEXTBOOK

Get your copy at the PCR bookshop

www.pcrtextbook.com

THE ONLY TEXTBOOK YOU NEED

The mission of PCR is to serve the needs of each individual patient by helping the cardiovascular community to share knowledge, experience and practice.

Its activities cover a large spectrum, from the organisation of annual courses in Europe, Asia and the Middle East to editing a scientific journal, publishing textbooks as well as providing training seminars on thematic subjects.

PCR activities are made by and for you.
